Stand
Pole
Rail
Carry Bag

Design your banner at a maximum visible print size of **200** cm high **PLUS** your choice of rail as above, on a total banner height of 214 cm. 30mm print bleed at the bottom will cover any brief exposure when the banner is extended into its display position.

Note: Pole length differs on older models - **CHECK** before printing! Current length is 208 cm including the plastic end.

Thin or slippery banners may need double-thickness at the top achieved by adding a strip of masking tape or similar to the back of the banner before fitting the rail.
